Four thematic presentations were made during the meeting. Two of them were introduced by Mr Alexandre BAPTISTA COELHO. The first one was on “Evolution of the training of judges and prosecutors: present and future. EU and ENPI South partner countries’ perspective”. The second presentation by Mr Coelho was on “Training of judges and prosecutors: the Portuguese experience”.

The third thematic presentation was a workshop on the use of e-learning to strengthen cross-border cooperation between judicial training institutions and judiciaries, and was made by Mr *Peter GOLDSCHMIDT*, Director of the European Centre for Judges and Lawyers, EIPA Luxembourg and Supervisor of the Euromed Justice III Project. During this presentation the speaker introduced how e-learning can be used to strengthen cross-border cooperation between judicial training institutes and judiciaries.

On the second day of the meeting Ms Sara CAMPINOTI presented an overview of the current situation regarding EU Cooperation programmes in the Euromed region linked to the Judicial Training Centres. She also introduced the general policy of the EU in this field, the different programmes or projects and the different actions carried out by the EU in this area, the cooperation in the justice sector, and more specifically related to cooperation in training activities.

In this respect the participants introduced the main international cooperation activities related to training in which their institutions are involved.

Considering the objectives of this meeting and taking into account the recommendations made during the working sessions and the debate, the participants are of the opinion that this meeting has reached the expected results, i.e. it has given the opportunity:

1. To express their satisfaction for having been able to meet, strengthening in this way the links uniting them through their professional activity, work and duties.
2. To provide to the participants an overall approach concerning the EuroMed Justice III Project. This approach was mainly focused on the work developed during the 1st phase of the project.
3. To reaffirm the usefulness of promoting this kind of meetings which allow for a quality exchange and reflection between all those who are in charge of managerial duties directly related to selection and training of judges.
4. To reinforce existing and create new contacts between judicial training institutions of the region and the European Judicial Training Network.
5. To discuss more specifically how the work of the judicial training centres (or comparable institutions) could contribute to reach the main goals of this project and to the building process of the Euro-Mediterranean area of justice.
6. To discuss on how the work developed by the different judicial training centres (or comparable institutions) could be improved through the different networks devoted to training, how to take advantage of the use of new technologies and how to improve interaction among themselves.

7. To have the opportunity to propose some suggestions related to the topics that will be addressed during the training sessions to be held during the second phase of the project.
8. To appreciate the information given to them resulting from the recommendations adopted during the first phase of the project and pertaining to judicial training issues, while recognising the importance of such recommendations.
9. To consider that the work carried out by Judicial Schools and Judicial Training Centres in the Euro-Mediterranean area can bring a relevant contribution to consolidating a Euro-Mediterranean Justice area in the framework of the Euro-Mediterranean Partnership, in particular in the thematic areas addressed by the EuroMed Justice III Project.
10. To believe that judicial training centres can play an active role in implementing the above-mentioned recommendations, by incorporating them progressively in their institutional, pedagogical and operative action.
11. To state that interaction with the EuroMed Justice III project is a positive factor and that they will pay due attention to the development and results of the second phase of this project.

Participants agree with the conclusions of this meeting.
